

STEALTH POSITIONING

Stability Is a Snap

stealthproducts.com

Stealth's Positioning line of pelvic belts, vests, chest straps and foot positioners are intended to increase trunk stability, aid in properly aligning the pelvis, and provide correct posture in a wheelchair. With Stealth Products, stability is a snap!

Breathable Material
Constructed from a unique open-cell material that allows air to circulate and moisture to escape. This contributes to reduced heat buildup and a cooler, drier, and more comfortable user experience.

Dynamic Support
Dynamic Support provides postural control, a degree of trunk movement, and a softer fit on the body. The user has movement within a limited range encouraging return to their neutral position.

Offset Belt Anchors
A slight offset allows for easy adjustment without loosening the anchor bolts.

Structured Support
The structured material is more resistant to high tone which helps maintain correct posture.

Swivel Buckles
Swivel buckles on the lower attaching straps allow self-adjustment, supporting the correct angle of attachment.

Full Length Attaching Straps
Provide for proper positioning of the top side release buckles, ensuring that the posture support maintains adjustment.

Posture Support

- Breathable Material
- Dynamic & Structured Support
- Classic & Contoured Styles
- Swivel Buckles
- Full Range of Sizes
- Offset Belt Anchor
- Large Neck Cavity
- Full Length Attaching Straps

Classic Style

The Classic Style offers a large padded surface for the thoracic area.

	A	B	C	D	E	F	G	H

Pelvic Belts & Pads

- Help maintain a neutral pelvic position, which directly affects seated body alignment and distributes pressure appropriately.
- Increase postural stability, decreasing the effort needed to sit upright and facilitating upper extremity movement.
- Contribute to proper head positioning and neck alignment.
- Reduce negative postural tendencies that can lead to orthopedic asymmetries and other secondary medical complications.
